Universal Bail Arm For Portable Instrument Enclosures

Tilt and swivel carry handle bars made of diecast zinc for canting and carrying metal electronic enclosures. The strong push-button ratchet features 30° indexing. Aluminum handle profiles are ordered separately and fit between the two side arm assemblies. The handle profiles are supplied cut to the required length (26 mm shorter than the width of your enclosure). This is specified by completing the chosen handle profile part number.

In order to improve the stability, we recommend glueing the aluminum profiles to the side arms.

Standard colors

How to order: replace **xxx in the part number with the length required. Example: 350 mm wide enclosure, handle profile length is 324 mm (350-26). So the part number will be **M 50 93 0-324** with the handle painted in silver metallic RAL 9006. If the enclosure dimension is 350.5 mm the part number would be **M 50 93 4-324.5** with the handle painted in anthracite RAL 7016.
