Unicase

Assembly Procedure

1. Insert four rubber feet into case bottom.

2. Insert eight M3 captive nuts into the two assembly profiles. (Option: for fast and easy assembly, insert captive nuts using assembly tool accessory ‘M5500001’)

3. Secure the two assembly profiles to the case bottom using four of the M3 x 6 screws (fastening to the captive nuts).

4. Secure the case top to the assembly profile as per step 3.

5. Secure the front panels using the remaining M3 x 6 screws (fastening to the front and rear of the assembly profiles). The case is now ready for use.
